

Cestino Solare

Gabion basket systems for PV parks

Partners in architecture!

BENEFITS

OF CESTINO SOLARE

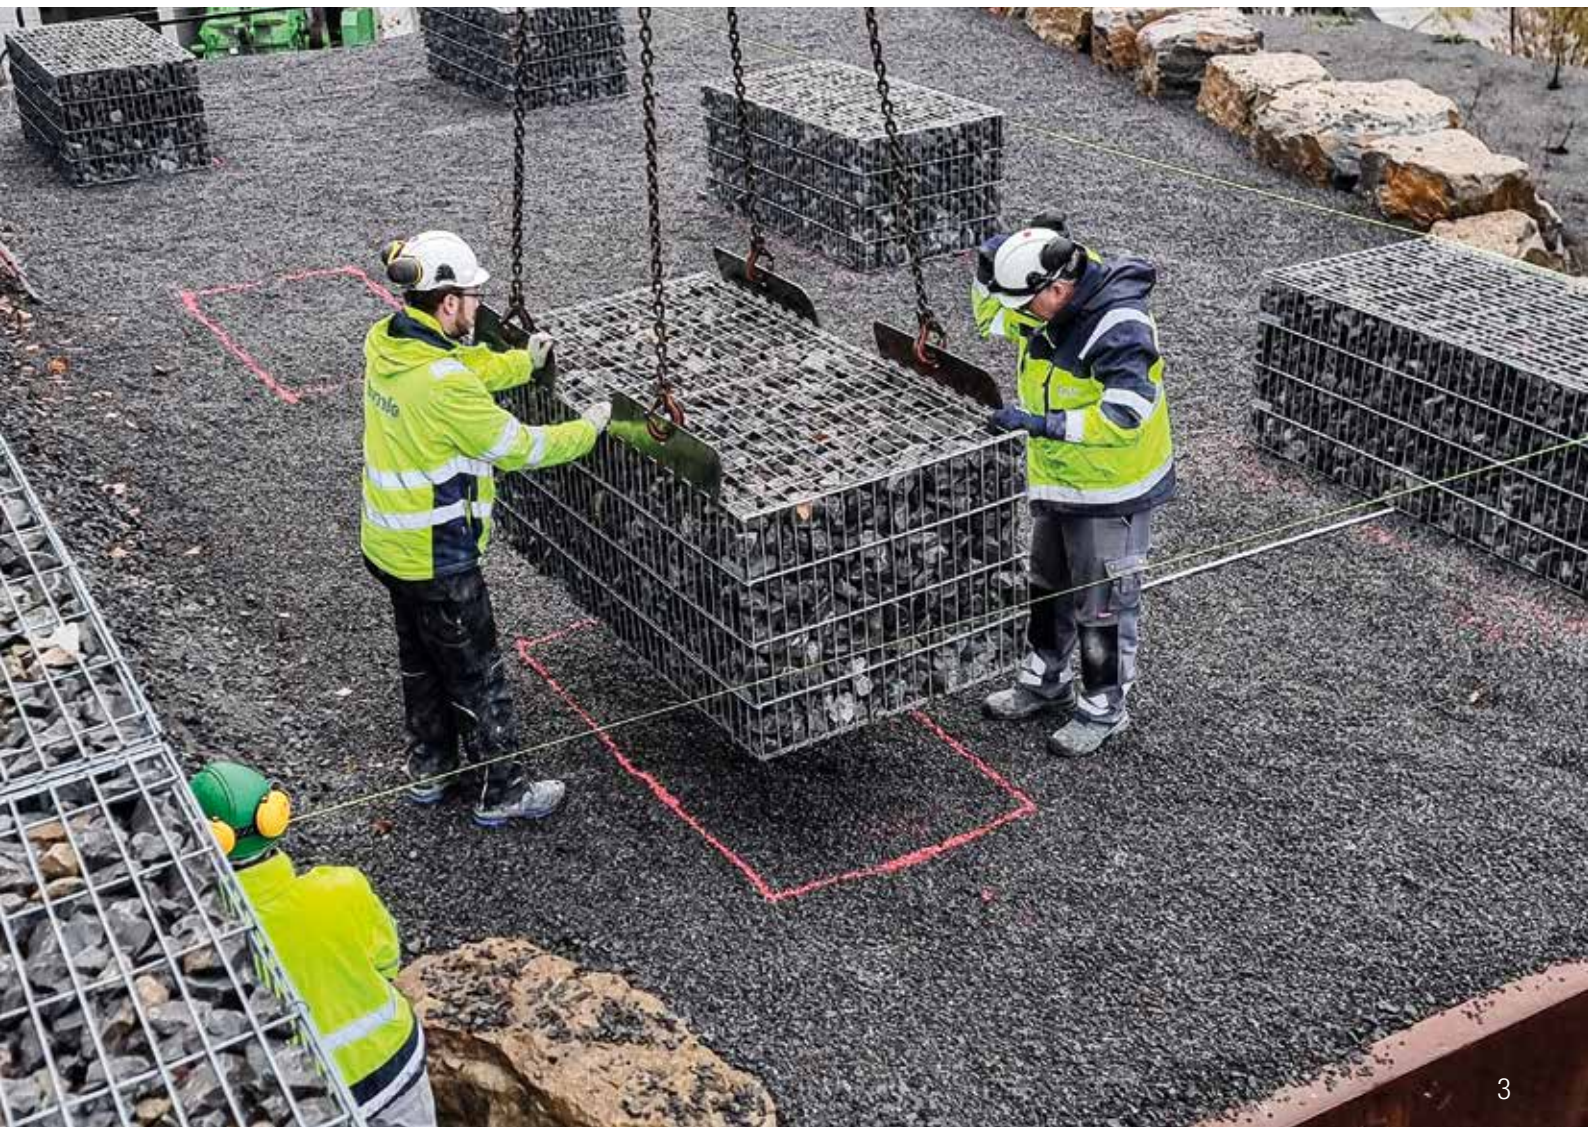

- extremely fast, flexible installation of pre-filled baskets
- gabion system does not require any maintenance
- 100 % recyclable
- very long service life due to 6 mm wire gage and thick zinc coating
- adjustable stud frames that absorb moderate settlements without damage
- little surface preparation required
- shelter for insects and small animals
- no concrete foundation required
- modules can be expanded as needed
- excellent drainage
- complete structural analysis
- baskets can be moved as often as required

GABION BASKET

CREATIVE. INDIVIDUAL. HIGH-QUALITY.

The LEDROSTEEL BOX is a pre-filled, transportable, high-density gabion basket that bears the CE label. Each gabion can be moved by means of lifting chains with hook plates. This means that the prefabricated gabions can be set in place at the desired location, even on challenging terrain, using a tower crane, mobile crane, wheel loader, forklift, or backhoe with appropriate overhang.

CESTINO SOLARE SINGOLARE

CONSISTS OF:

- 1 Gabion
- Steel substructure
- 4 PV panels (approx. 1772 x 1134 mm)
 - Inverter/storage
 - Output: approx. 1.5 KWp
- Footprint: 240 x 301 x 253 cm (length x depth x height)

CESTINO SOLARE PLURALE

CONSISTS OF:

- 2 Gabions
- Steel substructure
- 10 PV panels (approx. 1772 x 1134 mm)
 - Inverter/storage
- Output: approx. 4.4 KWp
- Footprint: 600 x 301 x 253 cm (length x depth x height)
